

# Erwin Road Montessori School

Your children are powerful, capable learners, able to create themselves when provided with an atmosphere of freedom, respect, independence, and love.

We provide a learning environment in an intimate home-like setting where children may choose from a rich variety of spaces and materials designed to meet their developmental and individual needs and inspire thinking and creativity.

Our teachers' interactions with children are warm and positive. Children's choices, preferences, and individuality are always respected.

Through a traditional Montessori learning environment, we provide a warm, joyful and purposeful start to every child's learning journey.

Call or email to schedule a tour of our beautiful setting!

“ when they are  
**ready** they will  
do it  
~ Maria Montessori ”

## WHAT IS MONTESSORI?

Montessori is a child-centered approach to education that seeks to develop natural interests and activities rather than use formal teaching methods.

education is not something which  
the teacher does, but is a

“natural process which

develops spontaneously

~ Maria Montessori

## Our Toddler Community

18 months to 3 years

A natural impulse to imitate the world around them propels toddlers into action. Imitation of adults and meaningful, real work are the most important activities at this stage of development. Toddlers learn through their senses and by moving freely in their surroundings. We provide an environment that meets the toddler's need for movement, language acquisition, and order. Teachers foster a warm, nurturing setting to ease the transition between home and school life.

## Primary Classroom

3 years to 6 years

In this multi-age classroom, children at various stages of development learn from and with one another. Younger children receive inspiration from older students, who serve as role models. Older children develop leadership skills and a sense of social responsibility. Curriculum covers language development, science, mathematics, sensorial exercises, geography, art, music, and practical life. The curriculum embraces the development of the whole child: intellectual, emotional, social, and physical.
